

## CV Borut Likar

Borut Likar is a Full Professor at the University of Primorska–Faculty of Management where he also worked as a Research & Development Vice-Dean and head of Department for innovation and technology. He is also a Head of the Institute for Innovation and Technology. Dr. Likar achieved his PhD at the Faculty of Electrical Engineering, University of Ljubljana, Slovenia.

Likar's research and applicative work is oriented in management of creativity, innovation processes, R&D and technology in companies. He also developed some new methods regarding mastering the front end of innovation. He is also strongly focused on encouragement of creativity, innovation and entrepreneurship in educational system, especially elementary and secondary school. He developed a comprehensive concept of a national society of innovative youth and was invited to present it at the United Nations' and at the Closing Conference of the European Year of Creativity in Stockholm.

Moreover, Likar is the author of hundreds of scientific and professional publications. He is an innovator and a recipient of many awards for his innovations also a golden medal at the most important innovation fairs in South Korea and Kuwait. In addition, he has received many other sound invention medals and awards worldwide (Germany, Poland, Croatia, Slovenia). He also received the "Prometheus of Science for Excellence in Communication" awarded by the Slovenian Science Foundation and the business results based award "Mind of Primorska" and the "Award of Merit" by the largest Slovenian association of innovators ASI. Furthermore, he is the initiator and the head of over 100 successful basic research, applied, technological and other national and EU projects.

In addition, he is the author of ten patents, countless models and copyright works, many of which proved to be extremely marketable. He is the founder of the national association of innovative youth and one of the founders of the incubator of the University of Primorska. He is also active as an evaluator of the EU projects, guest speaker, reviewer of scientific publications, and a chair/editor of numerous (inter)national scientific conferences and publications. Among numerous lectures he has given, the talks at the United Nations' headquarters in Geneva and twice at the European Parliament in Brussels were met with a particularly wide response.
